Portfolio: cparaschivdev.github.io/portofolio-cristian-paraschiv

PROFILE

MSc Data Science and AI graduate (DISTINCTION) focused on reliable machine learning systems, explainability, analytics dashboards, and practical product delivery. Strong interest in translating raw data into clear decisions through ML workflows, visual interfaces, and documented delivery.

EXPERIENCE

Volunteer Full-Stack Web Developer - 3Ks Judo Club

- Built and launched the official club website end to end, from domain registration, cloud hosting, and DNS to handover documentation.
- Developed the site with HTML5, CSS3, JavaScript, and PHP, including maps, grading information, and a media gallery.
- Cut page load time by about 30% with WebP assets and lazy loading.

EDUCATION

- MSc Data Science and Artificial Intelligence - DISTINCTION
- BSc Cloud Computing - First Class

CORE SKILLS

Machine Learning

Python, Scikit-learn, TensorFlow, PyTorch, Keras, model evaluation, feature engineering, imbalanced learning, explainability with SHAP and LIME.

Data and Analytics

Pandas, NumPy, SQL, Power BI, exploratory data analysis, data cleaning, dashboard design, visualization storytelling.

Application Delivery

React, Vite, FastAPI, Streamlit, API integration, Git, GitHub Actions, deployment workflows.

Product and Communication

Information architecture, responsive layout, case-study writing, stakeholder-focused recommendations.

SELECTED PROJECTS

- AI-Powered 3D Facial Recognition for Crime Intelligence** - Research prototype combining 3D reconstruction, embeddings, YOLOv8, FastAPI, React, forecasting, and governance layers.
- Explainable ML for Bank Marketing Campaigns** - Streamlit app with LIME/SHAP explainability, model comparison, batch prediction, and schema validation.
- Plant Leaf Disease Classification** - Residual CNN and EfficientNetV2 experiments for 22 classes, with class weighting and Optuna tuning.
- Profit Forecasting with Ensemble Models** - Random Forest and Gradient Boosting workflows with evaluation metrics and business interpretation.
